

# OUR PROGRAMS

## SCHOOL SERVICES

### Professional welfare support for students and their families.

**School Services** places a variety of different qualified welfare staff including psychologists, speech pathologists and social workers in primary and secondary schools across Victoria to support students experiencing difficulties.

These experienced professionals can help the school during leave vacancies to develop or facilitate programs, support and train staff, or provide psychological, educational and speech pathology assessments. Our consultants are well-versed in the specific requirements to support disability applications for the Department of Education and Training.

### A NETWORK OF TRUSTED PROFESSIONALS

OzChild maintains a pool of highly trained, experienced welfare and mental health professionals who can be placed in schools at short notice or to complete assessments.

If a specific type of professional is needed, we have the networks, recruitment and advertising mechanisms in place to rapidly find the right person for the task.

**School Services** provides contract staff to all schools including government, Catholic and independent at both primary and secondary levels. We also provide services to other non-school and community organisations that support students.
